PROFESSIONAL SUMMARY

MCA student who loves building software and exploring new tech. I am very excited to start my career as a Software Engineer where I can write clean code in Python, Java, and C to bring full applications to life. Lately, I've been really interested in building quick product prototypes and experimenting with GenAI and AI agents. I am a fast learner who thrives on feedback, and I am eager to dive into extensive training and mentorship so I can take on complex technical challenges and grow as an expert developer.

AREA OF INTEREST

Full-Stack Engineering, Generative AI & Agentic Systems, Application Design, Software Development

TECHNICAL SKILLS

Programming Languages:	Python, Java, C, PHP
Emerging Tech & AI:	GenAI / LLMs, Agentic Codebases, LangChain, Vector Databases
End-to-End Dev:	Front-end (HTML/CSS, Streamlit), Middle Layer & Backend (SQLite, MySQL), APIs
Core Concepts:	Object-Oriented Programming (OOP), SDLC, Problem Solving, Database Management
Development Tools:	Git, VS Code, MySQL Workbench

PROJECTS

Self-Adaptive Multi-Agent RAG Framework (Currently Developing)	<i>Python, LangChain, LLMs, Vector DB</i>
- Currently building a custom AI assistant using GenAI and agentic workflows to help users make smarter decisions based on their specific needs. - Using LangChain to create step-by-step AI processes, giving the system the ability to search for, evaluate, and combine information all on its own. - Writing flexible code to tackle complex assignments, focusing on turning emerging AI trends into real, working software solutions.	
TaskFlow – Smart Task Management System	<i>Python, SQLite, Streamlit, Git, SMTP</i>
- Built a complete task management app from scratch to get hands-on exposure to how the front-end, middle layer, and backend connect. - Designed the backend and SQLite database to securely store user accounts, handle logins, and update task statuses in real time.	
Game Performance Analytics Dashboard (Mini Project)	<i>Python, Pandas, Matplotlib, Streamlit</i>
- Put together a quick, interactive product prototype using Python and Streamlit so users can easily see and understand complex game stats. - Used Pandas to clean up messy raw data, making sure everything flows smoothly from the moment data is ingested right to the user's screen.	
Jewelry E-Commerce Platform (Admin Panel Module)	<i>PHP, MySQL, HTML, CSS, Git</i>
- Teamed up with classmates to build an admin dashboard from start to finish, keeping track of store inventory and user profiles. - Wrote PHP scripts and SQL queries for the middle layer and backend to make sure logins were safe and data was always accurate.	

EDUCATION

Master of Computer Applications (MCA) — 87.4% <i>SRM Institute of Science and Technology, Chennai</i>	Pursuing (Expected 2027)
Bachelor of Computer Applications (BCA) — 72.24% <i>Thiagarajar College</i>	Graduated 2025
Higher Secondary Certificate (HSC) — 79.6% <i>VHN Higher Secondary School</i>	Completed 2022

CERTIFICATIONS & TRAINING

- **Excel Essentials for Data Analytics** – IBM
- **Advanced Programming Training (60 Hours)** – Focused on analytical thinking, core logic, and data structures
- **Programming in Java** – NPTEL (IIT)
- **Soft Skills & Communication Training (72 Hours)** – Certified in Personality Development
